Performance

They all know that their products and displays work better and look their best when using Brillianize®, America's #1 rated anti-static cleaner and polish for plastics, glass and all hard shiny surfaces. When professionals and enthusiasts demand the highest quality they demand Brillianize and they use the Brillianize cleaning and polishing system. Brillianize makes the best cleaning solution and the best cleaning cloths.

Quality

Brillianize is specially formulated to clean, preserve and protect high performance big screen televisions, plasma monitors, photo copiers, scanners, retail and show displays or any non-porous surface. Brillianize is safe for coated optics too.

Brillianize lint free reusable soft cloths are the perfect match for your complete cleaning solution. These soft absorbent reusable cleaning and polishing cloths are specially designed for use with today's plastic and glass products.

Plastic or glass

Brillianize is safe to use with lucite, Plexiglas®, carbon fiber, acrylic, poly carbonate, Lexan®, Acrylite® and all plastic or glass surfaces. Manufacturers use Brillianize products in the final production stage to enhance the appearance and performance of their finished products.

Keeping good company

When appearance is everything rely on Brillianize. Companies like *Tama Drums*, *Gulfstream*, *Aaron Brothers*, *The National Park Service* and others all use Brillianize products. Thousands of end users who want the best appearance for their personal possessions use and recommend Brillianize.

At home at work or on the go

Brillianize Instant Detailer (ID) singles in convenient foil pouches help you maintain the best appearance and performance no matter where you are. Each Brillianize ID is a complete cleaning and polishing system with a two chamber pouch that includes a wet and dry lint free soft cloth. Brillianize IDs provide cleaning mobility at its best.

Safe to use

These companies and Brillianize stake their reputation on the performance and appearance of their products. Brillianize is non-flammable, non-toxic and non-hazardous to people or the environment.
